MFG. of : COMPACT YARN

 www.skyspintex.com

We are manufacturing Compact
Yarn with world class Quality.

About us

The Company has been incorporated on 17 July 2015 under The Companies Act, 1956 with CIN No. U17291GJ2015PTC083871.

Company's registered office is situated at 3, 2nd Floor, Suketu Complex, Near Astha Bungalows, New India Colony Road, New Nikol, Ahmedabad - 382350 in the State of Gujarat.

The project is proposed to manufacture cotton yarn of average NE 30s Count Combed, Compact with an installed capacity of 27360 spindles.

Sky Spintex is one of the recognized spinning mill in Gujarat and it is known for its quality. As ginner, they are very well know for their cotton and its parameters and that's why they are delivering best quality of yarns.

While Sky Spintex is relatively young company in terms of textile firms, the management team of the company has many year of experience in the yarn manufacturing Field.

Sky Spintex has worked hard in putting together team of managers, technicians, sales people and production associates to lead.

Sky Spintex in this competitive industry. While each individual contributor has a distinct and different role within the company, it takes everyone at sky spintex working together for the company to achieve maximum success.

Cotton industry in Gujarat region is exploring new lines of business in the spinning mill sector. Gujarat state government's integrated approach to strengthen the value chain and its new textile policy has ensured state's unique identity at national and international market.

Gujarat has unique strengths with respect to the availability of raw material that helps to produce good quality yarns. The state is the largest producer of cotton in India, with a share of over one-third of the total cotton production.

In addition to this, the state's textile policies provide interest subsidy for value addition in textile chain from ginning to garment manufacturing and technology up gradation has given boost to the investment in Gujarat.

Sky Spintex is the company who puts its business on forward integration and set up a spinning mill of 27360 spindles with complete system from LMW Machine with SUESSEN Compact System.

Our Products

At Sky Spintex, we work with unparalleled technology that can process this cotton into high-quality sustainable yarns. We have set up a one-of-a-kind plant not only in terms of capacity but also in terms of location and operational methods. It is our superior production techniques and quality of the product that enables us to produce a variety of quality yarns that are in demand both within the country and internationally. We are revolutionizing the textile industry with quality “no touch yarn” through state of art technology.

100% Cotton Combed Compact with P.P. Cleared Yarns

We product richest quality of compact yarns using the advanced techniques and spinning machines.

Quality Assurance

Quality assurance is carefully imbibed in every process and is every employee's obsession. It begins at the ginnery. Loyal's cotton selectors choose the gins from where Loyal buys its cotton. The cotton is thoroughly tested using AFIS instruments and issued for mixing, using a bale management system which ensures a narrow band of average yellowness and micronaire values.

Fully equipped quality control labs :

AFIS advanced fibre information system is used to get a clearer picture of the cotton and process slivers.

Mesdon : For online measurement of neps at carding and combers at all Units with Uster Quantum expert-3 for Online Quality Monitoring System.

Uster 6 Advanced yarn and Sliver Quality Testing machines including fabric Simulator with a software to identify the source of defect.

Classimat : Loyal is having Class UQM-3, an advanced yarn fault detection and classification instrument.

We have a strong presence in the
domestic and global market
and have established ourselves
as reliable suppliers.
